Product Catalogue

Our vision

MediLime focuses on innovating and improving enteral feeding systems, to make the life of users more enjoyable. MediLime not only co-operates with specialists, such as doctors and nurses, but also with end-users. This enables MediLime to continuously optimize and expand its range.

Nutrition is essential

Not only to keep our body healthy, but also to enable us to grow and heal. However, there are various medical reasons which can make consuming food difficult. For this group of people, MediLime has developed new products.

“I’m very enthusiastic! The button and sealing caps are easier and faster to insert and more pleasant to replace, I see much less irritation.”

Heleen Voogt is a passionate nursing consultant at the Pediatric Stomach-Liver-Intestine Department at the Academic Medical Center (AMC) in Amsterdam.

The products

MediLime supplies all types of products for enteral feeding, such as Nasogastric Feeding Tubes, Tummy Buttons, Gastric Feeding Tubes and Feeding Syringes. In addition, our range also has accessories such as caps, clips and connectors.

The MediLime Tummy Button and all associated accessories meet the new global standards for Feeding Catheters. These new products – in contrast to other products – contain only tissue-friendly materials and are free of plasticizers.

Accessories

MediLime supplies a large number of (ENFit) accessories. The range includes Feeding Syringes, bottle adapters, connectors, sealing caps and clips.

Connections

The same applies to the Tummy Button, the feedback from end-users and specialists is leading in innovating the Extension Tubes. In order to meet the demand in different settings there is a variety of possible connections:

Extension Tubes

MediLime Extension Tubes are used to administer enteral nutrition and/or medication through the button.

The MediLime Extension Tubes can be used for all buttons and are available with ENFit, ENFit/Y and bolus connectors.

The MediLime Extension Tubes are made of the highest quality polyurethane, are latex free and contain no plasticizers.

The Extension Tubes are available in 30 and 60 cm lengths (12 and 24 inches).

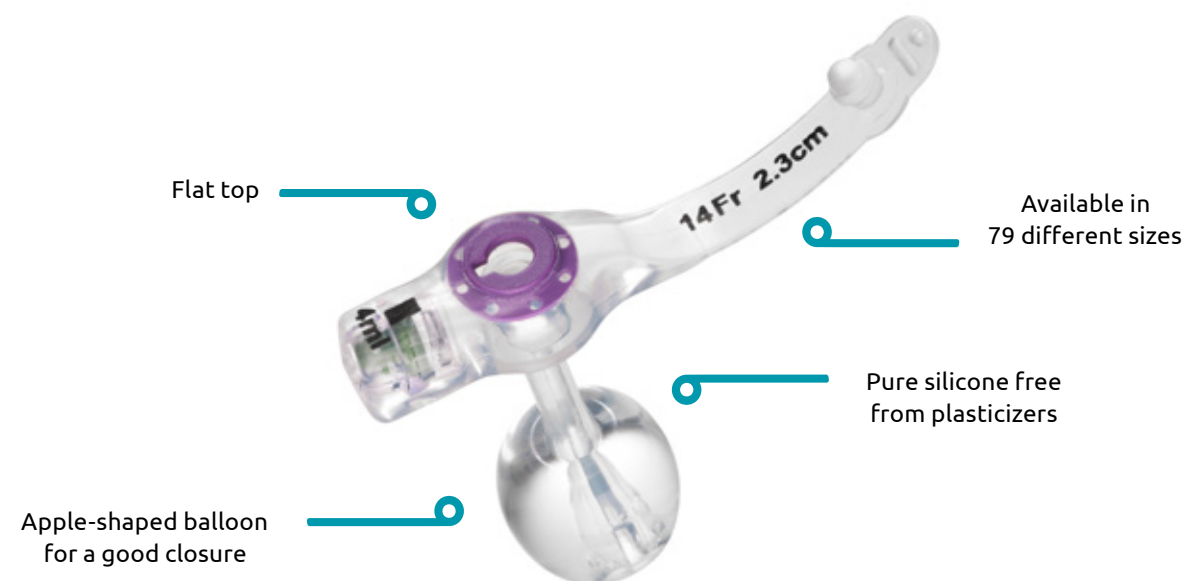

A photograph of a family of three, a mother, a father, and a young child, all smiling and looking down at a document they are holding together. The mother is on the left, the father is on the right, and the child is in the center foreground. They are all wearing white clothing. The background is a soft, out-of-focus indoor setting.

“
Our ultimate goal
is to provide
the best product
for everyone.”

“
Making
life easier.”

The MediLime Tummy Button

A button can be a comfortable solution, because of its small size and the fact that you don't have to carry a tube. We are committed to listen to the end-users and specialists and we show this by innovating our products year in, year out.

Some key features

The MediLime Tummy Button has one sole purpose, and that is to make living with a feeding system more pleasant and efficient.

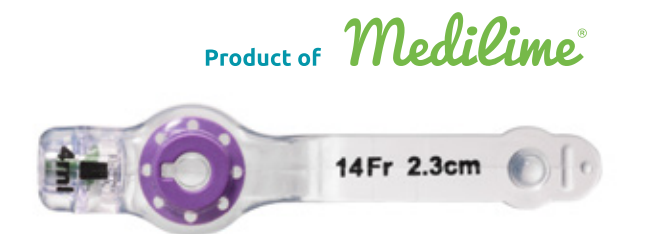

- The MediLime Tummy Button consists of pure silicone, is latex- and DEHP free, resulting in a healthy skin around the gastro stoma
- An apple shaped balloon improves an ideal shape for closing the stoma channel
- Best compatibility with all MediLime Extension Tubes
- Various balloon diameters (per size 12FR up to 24FR, from 3 up to 8ml volume) and is available in all lengths (0.8, 1.0, 1.2, 1.5, 1.7, 2.0, 2.3, 2.5, 2.7, 3.0, 3.5, 4.0, 4.5 and 5.0)
- The Tummy Button comes with an input guide. This can be a useful tool when placing the button if there is scar tissue at the fistula opening or with a larger size of the Tummy Button

Package contents

The Tummy Button is packed in a box along with the following accessories for easy placement:

- Input guide
- Syringe
- Lubricating gel 5 grams
- Gauze

The MediLime Extension Tubes

Our Extension Tubes are used to administer enteral nutrition and/or medication through the button. The MediLime Extension Tubes can be used for all buttons and are available with ENFit, ENFit/Y and bolus connectors.

The MediLime Extension Tubes are made of the highest quality polyurethane, are latex free and contain no plasticizers. The Extension Tubes are available in the lengths 30 cm and 60 cm (12 inches and 24 inches).

- High flow button connection (ideal for usage with a feeding pump)
- Improved material to reduce the impact of medication
- MediLime is the only supplier of Extension Tubes with the purple connections
- Perfectly applicable on all buttons
- More grip for easy placement

Connections

Just like the Tummy Button, the feedback from end-users and specialists is leading in innovating the Extension Tubes. In order to meet the demand in different settings there is a variety of possible connections:

Swivel connector

MediLime Extension Tubes are equipped with a swivel connector. The connector rotates separately from the tube, allowing it to be connected and disconnected more easily.

Product features

MediLime Stoma Measuring Catheter

The MediLime Stoma Measuring Catheter is used to obtain the correct size of the MediLime Tummy Button. The stoma canal is measured with this catheter.

The use of the Stoma Measuring Catheter will result in a more precise Tummy Button placement. We strongly recommend using one for each (new) placement of a button in order to optimize the perfect fit.

Accessories

MediLime supplies a large number of (ENFit) accessories for the administration of enteral nutrition and medication through the Feeding Tube. The range includes bottle adapters, connectors, sealing caps and clips.

MediLime is continuously working on optimizing its range and strives to bring the best product for everyone.

Bottle adapters

To extract medication from bottles, a bottle adapter is used. This is a screw cap that is placed in the medication bottle which makes it possible to suck the medication with the help of an Feeding Syringe.

The MediLime bottle adapters are available in various diameters for the various sizes of medication bottles.

Article	Description	Quantity
 BAISO1	MediLime ENFit bottle adapter 1 ø 12mm - 15mm	100 pieces
 BAISO2	MediLime ENFit bottle adapter 2 ø 14mm - 16.5mm	100 pieces
